Amishi Jha is an associate professor of psychology at the University of Miami and director of contemplative neuroscience for its Mindfulness Research and Practice Initiative. Previously, she was an assistant professor at the Center for Cognitive Neuroscience at the University of Pennsylvania.

Jha studies the neural bases of attention and the effects of mindfulness-based training programs on cognition, emotion, and resilience. With grants from the Department of Defense and several private foundations, she has been systematically investigating the applications of mindfulness training in education, corporate, elite sports, first responder, and military contexts. In addition to her published body of research, Jha’s work has been featured in outlets including TED.com, National Public Radio, and Mindful Magazine. She has been invited to present her work to NATO, the Parliament of the United Kingdom, the Pentagon, and the World Economic Forum.

Jha received her doctorate from the University of California–Davis and her postdoctoral training in functional neuroimaging at the Brain Imaging and Analysis Center at Duke University.
